(54) Methods for treating an ischemic disorder and improving stroke outcome

(57) The present invention provides for a method for
treating an ischemic disorder in a subject which comprises
administering to the subject a pharmaceutically acceptable
form of a selection antagonist in a sufficient amount
over a sufficient time period to prevent white blood cell
accumulation so as to treat the ischemic disorder in the
subject. The invention further provides a method for treating
an ischemic disorder in a subject which comprises
administering to the subject carbon monoxide gas in a

sufficient amount over a sufficient period of time thereby
treating the ischemic disorder in the subject. The invention
further provides a method for treating an ischemic disorder
in a subject which comprises administering to the
subject a pharmaceutically acceptable form of inactivated
Factor IX in a sufficient amount over a sufficient
period of time to inhibit coagulation so as to treat the
ischemic disorder in the subject.
